Legenda dos blocos  
escala 1:25

Planta de locação  
escala 1:75

OBSERVAÇÕES IMPORTANTES:

1- O FNDE disponibiliza as fundações do projeto através do cálculo de blocos sobre estacas. A taxa de resistência do solo utilizada no cálculo é de 2kg/cm<sup>2</sup>, considerando o solo homogêneo. As estacas possuem 3,5 m de comprimento, atendendo a essa resistência. Caso a taxa de resistência do solo do terreno onde será executada a obra seja inferior a esta, as fundações deverão ser recalculadas pelo proponente e a respectiva ART deverá ser emitida. Para o recálculo das fundações, disponibilizamos as cargas nas fundações.

2- Estes projetos estão disponíveis no site do FNDE

3- Recomendamos que seja realizada a sondagem do terreno pelo método SPT para determinação da resistência do solo e análise do perfil geotécnico.

4- A profundidade das estacas foi calculada utilizando-se o Método Aoki-Veloso para estacas.
